Updated Row in Destination

Verification Of Updated row in SQL

The screenshot displays the DBeaver 22.2.0 interface. The SQL Editor window shows the following query:

```
select count(LoanNr_ChkDgt) as count_loan, min(ApprovalDate) as minimum_date,
max(ApprovalFY) as maximum_aFY, sum(NoEmp) as sum_emp
from Nasreen_FA_LoanApproval
```

The Results window shows the following data:

	count_loan	minimum_date	maximum_aFY	sum_emp
1	1,999	1971-08-13 00:00:00.000	2,006	17,437

The status bar at the bottom indicates: Rows: 1, 1 row(s) fetched - 255ms, on 2022-10-07 at 21:05:55. The system tray shows the date and time as 9:06 PM 10/7/2022.
